DETAILED ACTION

Claim Objections

1. The disclosure is objected to because of the following informalities: the specification page 15, line 30-page 16, line 5, teaches a **software stored in the personal computer is used to compute parameters** required by the correction module 31 based on the data W (fT), W (-fT) and L. The specification further teaches that the **software stored in the personal computer performs a different process from the prior art**. However, it is noted that such a software is not disclosed in the specification.

Page 15, line 17, "spectrum" is mistyped as "specturm".

Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second "D/A converter" as recited for instance in claim 13, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the second "D/a" as described in the specification, see for instance page 15, lines 6 and page 16, line 23. In addition, fig. 3B, S8, "obtaining" is mistyped as "btaining". Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid

Art Unit: 2611

abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Response to Amendment

Art Unit: 2611

5. Applicant's response has overcome the objection to claims 1-24. However, after further consideration, the drawing and the specifications are objected to as set forth above.

Allowable Subject Matter

6. Claims 1-24 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: A method and apparatus for I/Q mismatch calibration are disclosed. The closest prior art Wynn, US Patent No. 6,009,317, discloses similar method and apparatus. However, Wynn, does not teach or fairly suggest, in combination with the other limitations, the limitations recited in claim 1, lines 12-38 and similar limitations recited in claim 13.
